Dear Colleague

The Institute of Mathematics Research and Training (IMRT) is a newly formed Institute aimed at organising programmes for improving Mathematics Education and Research. The institute will be a forum where educators and researchers in Mathematics can come together and work in collaboration. Opening more and more opportunities for providing Mathematics experience for students and researchers is one important component in improving education standards. Developing materials for enrichment programmes, short term workshop for undergraduate students, formation of regular discussion groups at research level etc are among the activities planned.

Your esteemed presence is invited to the inaugural function.
